SUMMARY

Product manager and pricing builder who ships recommendation tools people actually trust, not just ones that are statistically right. Founded PriceKeel, a decision-integrity layer that turns a live B2B pricing exception into an explainable guardrail learned from a company's own closed-won and closed-lost deals, the same trust-before-action problem underneath any pricing recommendation. Owned the product roadmap and 100+ feature backlog for sensor products at Sensata, then built the pricing tools, models and dashboards (1,200 opportunities, \$700K+ margin recovered) that made pricing tradeoffs defensible instead of guesswork. Builds AI agents on Claude to automate the repetitive analysis behind every pricing call.
