Hiring Team, BDO USA

Your posting asks for someone who builds pricing models for AI-enabled products, backs them with market and competitive research, and turns win/loss and margin data into a call Sales and Finance can act on. I ran that exact loop at Sensata leading the Bleeders and Leakers program: deal-by-deal review of competitive gaps and customer willingness to pay that recovered $700K plus in margin in two quarters, and raised distributor and channel-partner margins from 53% to 61% in the same stretch.

At Applied Materials I build competitive, value-based pricing for a fast-growing market and forecast its inflection points so pricing keeps pace with demand, the same discipline a pricing function for AI-enabled products and services needs to run. I also automate the repetitive side of that analysis with AI agents built on Claude, so the pricing tools and guidance a team ships do not bottleneck on manual spreadsheet work.

The win/loss and margin analysis side runs deep too. The FY2026 Bleeders and Leakers Power BI dashboard I built tracked 1,200 pricing opportunities against a $627 million target across 3 regions, 4 product families and 20 product lines, surfacing $433 million in margin gaps for leadership to prioritize by salesperson and product line. I sat with senior executives on AP26 revenue models and multimillion-dollar customer quotes, and drove +12% year over year revenue and +8% market share through price realignment informed by competitive benchmarking across 10+ key players, the market and competitive research piece your posting is hiring for.

Outside the day job I founded PriceKeel, a decision-integrity layer for B2B SaaS deal pricing that reads a live discount exception and recommends a guardrail built from a company's own closed-won and closed-lost deals, with an audit trail Finance can rely on. It is the same instinct this role is hiring for: turn pricing data into a decision someone downstream can act on and defend. Proof trail at adhi-pricing-ai.vercel.app/ref/bdo-usa.
