Hiring Team, CoreWeave

Your posting describes a team whose dual mandate is accelerating revenue and protecting the financial integrity of every deal, and that split is exactly the muscle I built at Sensata leading the Bleeders and Leakers program: a Power BI system tracking 1,200 pricing opportunities against a $627M target across 3 regions and 20 product lines, which surfaced $433M in margin gaps and let me close $700K+ of that in 2 quarters through deal-by-deal negotiation rather than a blanket policy change.

The part of the role about digging into deal economics and modeling financial outcomes is the part I have run most recently, at PriceKeel, which I founded to solve commercial-proposal structuring directly. It reads a live discount exception inside a deal platform and recommends an explainable guardrail learned from a company's own closed-won and closed-lost deals, with a P&L read and an audit trail Finance can review on every call. I run its CRM, CPQ, forecast and pipeline reviews and deal approvals myself, so I know what it takes to turn a messy commercial ask into a clean, data-backed recommendation Sales can act on the same day.

Guiding Sales partners with clear, actionable recommendations is the other half of this seat, and it is the half I was graded on at Sensata. I partnered directly with senior executives on AP26 revenue models and multimillion-dollar customer quotes, and I raised distributor and channel-partner margins from 53% to 61% in under two quarters by repricing parts sold through distribution so the gain held past the first renewal cycle instead of drifting back. That same price realignment drove +12% YoY revenue and +8% market share, benchmarked against 10+ competitors.

What I would bring to CoreWeave's GTM Finance team is someone who has already closed a quantified margin gap inside a multi-$100M business and is now building, from the ground up, the exact kind of deal-economics tooling this role runs by hand. Proof trail at adhi-pricing-ai.vercel.app/ref/coreweave.
