Hiring Team, Forward Financing

Your posting asks Sales Operations to test and adopt AI tools like Gemini and Claude, not just tolerate them. I already run AI agents built on Claude against my own repetitive sales and market analysis at Applied Materials, so that piece of the role is a continuation of what I do every week, not a new habit to build.

The dashboard and pipeline half of the job is where I have spent the last year. At Sensata I built the FY2026 Bleeders and Leakers Power BI dashboard, tracking 1,200 pricing opportunities against a \$627M target by win rate, dollar-per-win and stage distribution across 3 regions and 20 product lines. That dashboard surfaced \$433M in margin gaps for leadership to prioritize by salesperson and product line, and fed a \$700K margin recovery in two quarters, the same pipeline health and bottleneck read your posting wants for the Sales Department.

I run the CRM, CPQ, forecast reviews and deal approvals myself at PriceKeel, the company I founded, with an audit trail Finance can check on demand. That has given me a close read on what it takes to be the bridge between a Sales team and Finance, Marketing, Technology and Analytics stakeholders who all want a different cut of the same pipeline number, which is most of what this role asks for.

Forward's model of funding small businesses that traditional lenders pass on tracks close to the P&L and revenue targets I have carried at every stop, from an 8-client portfolio at Pixis to a multi-hundred-million-dollar industrial book at Sensata. Proof trail at adhithyabhaskar.vercel.app/ref/forward-financing.
