Hiring Team, Fleetio

Your posting asks someone to own the monthly commission cycle end to end: data prep, payout validation, and a clean handoff to Payroll with every discrepancy documented. That is the discipline I built at PriceKeel, where I run CRM, CPQ, forecast reviews and deal approvals and built the audit trail Finance checks before a number gets signed off. I treat every exception as a number that has to survive someone else's audit, not just mine.

The funnel and executive-reporting half of the role is where Sensata put me. I built the FY2026 Bleeders and Leakers Power BI dashboard: 1,200 pipeline opportunities tracked against a $627M target by win rate, dollar-per-win and stage distribution by salesperson, across 3 regions and 20 product lines. That dashboard is what surfaced $433M in margin gaps for leadership to prioritize, and it fed a $700K margin recovery over two quarters, the same pipeline-to-attainment reporting that territory and target-setting work runs on.

The interest in AI and automation in your posting is not new ground for me either. At Applied Materials I already run AI agents built on Claude against my own repetitive revenue reporting and analysis, with the habit your posting asks for: validate the output carefully before it goes near a number Payroll depends on.

Fleetio's commission cycle touches Sales, Account Management, Finance, People Operations, Marketing and GTM Systems every month, which is the same cross-functional rhythm I run at PriceKeel and have run at Sensata. Proof trail at adhithyabhaskar.vercel.app/ref/fleetio.
