Hiring Team, Cisco

Your posting asks for someone who can align launch plans, offer readiness and partner-facing assets with sales plays, not just own a backlog. At Sensata I owned GTM, pricing and channel structuring for a new sensing-product line into North America and Europe, drove $2M plus in first-year revenue, and built the sales enablement decks and case studies that got 50+ reps to a win rate 30% higher before the launch finished rolling out.

The offers and commercialization side of the role maps directly to work I already run. As Pricing Lead at Sensata I built a BU-wide Power BI price-increase model flagging where a price change could lift profitability past 50%, and used competitive benchmarking against 10+ key players to realign pricing, which drove 12% YoY revenue and 8% market share. That is the same balance of margin, competitive viability and growth your posting asks a product owner to defend with finance and pricing partners.

Before any of that reaches a launch date, it needs customer and partner signal, and a cross-functional group that actually moves together. I ran 30+ customer and partner interviews with OEMs and distributors to find the pain points worth fixing before launch, then defined the roadmap and a 100+ feature backlog with engineering across 3 regions, cutting time-to-market 20%. At Applied Materials I run that same kind of cross-functional work daily with Sales, Engineering and Accounts, turning field input into one commercial view, and automate the repetitive pricing analysis behind it with AI agents built on Claude, the kind of AI tool fluency your posting flags as a plus.

I build my own GTM before I ask anyone else to trust it: SwipeHire, a job-matching platform I shipped zero-to-one, carries its own competitive positioning against Jobright and three subscription pricing tiers I modeled from willingness-to-pay signals. I would bring that same habit, pricing and launch readiness built together instead of handed off, to this seat. Proof trail at adhi-product.vercel.app/ref/cisco.
