Hiring Team, VIZIO

Your posting asks for someone who can build the business requirements, launch materials and competitive analysis a B2B product marketing team needs, then stand in front of Sales, Product and Partner teams and make the data-driven case for a launch. That's the loop I ran at Sensata: I owned go-to-market end to end for a brand-new sensing product line, from positioning and pricing through channel and launch timing, and the materials I built drove $2M+ in first-year revenue.

The advertiser-facing half of this role is also work I've run directly, just on the media side instead of the device side. At Pixis I managed an 8-client D2C advertiser portfolio and ran the retail media and programmatic campaigns, Amazon Ads and Criteo, behind it. I built and kept current the case studies and campaign reporting that advertisers and account teams actually used, ran the end-user onboarding so clients could self-serve the platform, and cut churn 50% by catching account risk early. That's the same muscle your posting describes for working with brand advertisers and agencies, just learned on the buying side of the table instead of the selling side, which is useful context when you're building the BRD.

Competitive analysis is a thread through every role on my resume, not a one-off project. I built it across EMEA and the US at Sensata (sales enablement for 50+ reps, a 30% win-rate lift), and I build it now at Applied Materials as Strategic Marketing III, sizing markets and building value-based pricing with Sales, Engineering and Accounts. I also automate the repetitive parts of that analysis with Claude AI agents, so more of my time goes to the judgment calls, like what a competitive gap actually means for positioning, that a dashboard can't make for you.

I'd welcome the chance to talk through how I'd approach the Home Screen, CTV and programmatic GTM work specifically. Proof trail at adhi-product.vercel.app/ref/vizio.
