Hiring Team, Hyve Solutions

Your posting asks for someone who owns customer-level profitability end to end: monitor revenue, margin, pricing and cost, flag the risks, and drive corrective action with senior stakeholders. That loop is the one I ran at Sensata leading the Bleeders & Leakers program, recovering $700K+ in margin in two quarters and raising distributor and channel-partner margins from 53% to 61% by repricing parts sold through distribution.

The reporting half is not new either. I built the FY2026 Bleeders & Leakers Power BI dashboard, ranking 1,200 pricing opportunities against a $627M target across 3 regions, 4 product families and 20 product lines, surfacing $433M in margin gaps for leadership to prioritize by salesperson and product line. That is the same customer-level data-and-dashboard standard your req asks a senior analyst to establish and maintain.

I also built the governance layer that keeps that kind of program defensible once it scales. At PriceKeel I designed a guardrail engine and audit trail Finance can review for every pricing exception, and set up the CRM, CPQ and deal-approval flow it runs on, the same intake-and-prioritization discipline your req describes for sales requests. At Applied Materials I automate the repetitive half of that analysis with AI agents built on Claude, the automation-championing habit your req asks sales operations to bring.

I would like to bring that margin-recovery and reporting discipline to Hyve Solutions. Proof trail at adhi-pricing-ai.vercel.app/ref/hyve-solutions.
