Hiring Team, Coinbase

Your posting asks for someone who owns paid social and mobile UA end to end and pressure-tests it with a real measurement framework, not someone learning SKAN and incrementality on the job. At Pixis I ran iOS app user acquisition on Appsflyer and Adjust alongside retail media on Amazon Ads and Criteo, across international, non-English markets, for an 8-client portfolio at \$15K-\$90K per client per month.

That portfolio was not one channel run well. It was paid social, mobile UA and retail media held to one P&L target at once, the same cross-channel ownership this role runs at a larger scale. I delivered 3x ROAS in one month for a fashion brand through full-funnel restructuring, and used Amplitude and Tableau across 30+ campaigns to lift ROAS 40%, the testing-and-learning habit your team runs on creatives, audiences and bidding.

At Plug Power I owned \$100K/month paid budgets across business units, cutting CPA 25% through bid optimization and A/B testing across Google, Microsoft, Meta and LinkedIn, then automated the Mar-Tech stack for closed-loop reporting so spend tied directly to pipeline stage. At Applied Materials I automate recurring reporting with Claude AI agents, the same AI-forward habit your posting names directly.

What I would bring to Coinbase's Growth Marketing team is someone who has already run paid social and mobile UA as one P&L, not two separate budgets, and who treats measurement as the job, not a report at the end of it. Proof trail at adhi-growth-ai.vercel.app/ref/coinbase.
