SUMMARY

Product manager who shipped an **AI-powered platform** on the OpenAI API, from PRD to a working MVP for 50+ users. That is the same judgment call Glean's AI/ML Ops ask demands. Owned the sensor product roadmap and a 100+ feature backlog at Sensata (releases 25% faster, time-to-market cut 20%), grounding every call in 30+ customer interviews (CSAT +22%, adoption +18% across 50,000+ connected devices). Builds Claude AI agents at Applied Materials to review and automate repetitive analysis before it reaches a forecast, and reads SQL/GA4 data to tell what is working from what only looks like it is.
