Hiring Team, Kore.ai

Your posting asks for someone who can turn deal desk KPIs, cycle time, approval turnaround, discount trends, into something leadership actually reviews. At Sensata I built exactly that: the FY2026 Bleeders and Leakers Power BI dashboard, tracking 1,200 pricing opportunities against a $627M target by win rate, approval turnaround and discount trends across 3 regions and 20 product lines. It surfaced $433M in margin gaps and fed a $700K recovery in two quarters.

The commercial approval framework and CRM/CPQ workflow piece is work I already know from the inside, not just the outside. I founded PriceKeel to run exactly that: I own the CRM, CPQ, forecast reviews and deal approvals myself, with a guardrail engine that scores each discount exception against a company's own closed-won and closed-lost precedent, and an audit trail Finance can check on demand. That is the same evidence-based approval discipline your posting describes building out.

Drafting and reviewing order forms sits close to work I already do. At Sensata I drafted and reviewed multimillion-dollar customer quotes and order forms for a multi-$100M industrial book, partnering with senior executives on revenue models and site-transition strategy, the same cross-functional loop your posting names across Sales, Legal, Finance, RevOps and Product.

Kore.ai building an AI-native platform is also where I already operate day to day. I automate repetitive deal and pricing analysis with AI agents built on Claude, so an agentic approach to commercial operations is not new territory for me, it is the stack I already run. Proof trail at adhi-pricing-ai.vercel.app/ref/kore-ai.
