Hiring Team, TikTok

Your Branding team needs a PMM who builds enablement sellers actually use, not launch decks that sit in a shared drive. At Sensata I built the kit, talk tracks and case studies included, that 50+ reps turned into a 30% lift in win rates, and before that owned the positioning that turned a hard-to-sell technical feature into a 15% conversion lift on priority launches. That is the same translation this role asks for: a product capability turned into a narrative a seller can repeat cold in front of an advertiser.

I have also run the account side of an ad platform, not just the enablement side of one. At Pixis I managed an 8-person team covering 8 advertiser accounts on budgets from \$15K to \$90K a month, built the vertical playbooks that cut churn in half, and used Amplitude and Tableau to flag which accounts needed attention before a renewal conversation got hard. When one fashion-brand account needed a full-funnel rebuild, feed cleanup, smart bidding, creative refresh and lookalike expansion, we took it to 3x ROAS in a month. That full-funnel instinct, creative and bidding working together instead of in separate lanes, is what I would bring to a branding lever that has to prove itself alongside a performance-heavy book of business.

The feedback loop matters as much as the launch itself. At Sensata I ran 30+ structured interviews with OEMs and distributors and turned that into product roadmap recommendations that raised CSAT 22%, the same closing-the-loop work your alpha and beta programs need, from advertiser participation back to a global product team. I carry that habit into what I automate now at Applied Materials with Claude agents: the tooling exists to get to the recommendation faster, not to skip it.

This posting is asking for someone who can own a GTM motion end to end without being managed at the task level. I have done that as a founder as much as inside a company, and I would like to do it next for TikTok's NA sellers. Proof trail, including the Sensata enablement kit and the Pixis account work, is at adhi-product-ai.vercel.app/ref/tiktok.
