Hiring Team, Poshmark

Your posting starts from the buyer: understand why people discover, watch and buy on Show, then turn that into what a brand or enterprise seller needs to succeed. That is the same order of operations I ran at Sensata, where I sat through 30+ structured interviews across the OEM and distributor community before writing a single line of positioning, then turned what I heard into the enablement playbooks and case studies that armed 50 reps for launch and moved win rates 30%. Insight first, seller strategy second, never the other way around.

The fashion-marketplace, real-time-engagement side of this role is not new territory either. At Pixis I ran an 8-client D2C and fashion e-commerce portfolio, and when one fashion brand needed a fast turnaround I rebuilt its funnel end to end in real time: feed cleanup, smart bidding, creative refresh, lookalike expansion, for 3x ROAS in a single month. I also kept the enterprise case studies and account materials current across that portfolio, the same kind of proof-and-playbook work a brand or enterprise seller on Show would need to ramp with confidence.

I have also owned the GTM side end to end: positioning, messaging and launch for Sensata's new sensing products, which drove \$2M+ in first-year revenue, plus the behavioral-cohort KPI work in SQL and GA4 that told us which adoption signals actually mattered. Turning a live-shopping mechanic into a plain buyer benefit, and a buyer behavior pattern into a seller playbook, is the same translation work pointed in two directions, and it is the habit I would bring to Posh Live.

At Applied Materials today I automate my own recurring market and competitive analysis with AI agents built on Claude rather than rebuilding the same report every cycle, which frees up real hours for the insight and enablement work this role actually needs. Proof trail at adhi-product-ai.vercel.app/ref/poshmark.
