Hiring Team, ProSessed AI

Your posting describes one week closing a deal and the next launching a Meta campaign or rewriting positioning, and that range, not a narrow specialist lane, is exactly how I built PriceKeel. I run the pipeline, close pilots directly with early customers, and set up the CRM, CPQ and forecast reviews myself, with no one else to hand any of it to.

The paid and positioning half of this role is where I have the deepest track record. At Plug Power I owned $100K/month in budgets across Google, Meta and LinkedIn, delivering -25% CPA through direct bid optimization and testing, and built the Mar-Tech automation that kept lead flow and reporting closed-loop. At Sensata I owned GTM for a new product line end to end, positioning, channel and launch, driving $2M+ in first-year revenue and 35% more qualified leads, grounded in 30+ customer interviews before I committed to a bet.

Operating rhythm is the piece that ties outbound, paid and content together, and it is the piece I run daily. I carry P&L and revenue targets at Applied Materials, hire and manage teams, and report funnel and KPI numbers in weekly and quarterly reviews, the same discipline a founder's office needs to tell the founders what is working and what is not. I also automate my own recurring reporting with AI agents built on Claude, so moving fast with AI tools is already how I work.

I would welcome the chance to talk through the first outbound motion I would build for wholesalers in Canada, the UK and Australia. More of this work is at adhi-growth-ai.vercel.app/ref/prosessed-ai.
