Hiring Team, Amazon

At Pixis, I ran paid media on Amazon's own ad stack, Amazon Ads and Criteo, for D2C clients, alongside iOS app user acquisition through Appsflyer and Adjust. Ring Appstore is asking for that same two-sided motion: growth and engagement for the people using an app, paired with the partner-side programs that get the people building apps to promote them, just with Ring's hardware and app catalog standing in for a single D2C brand.

Direct evidence of fit:

- Owned end-to-end GTM for a new Sensata product line across North America and Europe, targeting, channel mix, positioning and launch together, driving $2M+ first-year revenue and +35% qualified leads from email and paid campaigns.
- Built the co-marketing enablement, decks, case studies, battlecards, that third-party OEM and distributor partners and 50+ reps used to promote a new product line, lifting win rates 30%.
- Built SQL and GA4 KPI frameworks across 50,000+ connected devices to find engagement signals and feed the cadenced business reviews leadership used to prioritize the roadmap.
- Cut client churn 50% at Pixis through retention-focused account strategy, and used Amplitude and Tableau to lift campaign ROAS 40% across 30+ campaigns.

As Strategic Marketing III at Applied Materials now, I size markets with Sales, Engineering and Accounts and automate the repetitive side of that analysis with Claude AI agents, so the time goes into the judgment calls, not the spreadsheet. I'm also building PriceKeel on the side, a decision-integrity layer for B2B SaaS deal pricing, which keeps me close to how a buyer actually signs off.

I'd like to bring that two-sided GTM and partner-enablement track record to Ring Appstore. Proof trail at adhi-product.vercel.app/ref/amazon if you want to see the launch and enablement work firsthand.
