Hiring Team, vCluster

Your posting asks for someone who owns quote-to-cash end to end: Salesforce administration and automation, rep support for the US sales team, commission support, reporting and dashboards, and the data hygiene that keeps all of it trustworthy. At Sensata, the Bleeders and Leakers Power BI system ranked 1,200 opportunities against a $627M target, and using what it surfaced I recovered $700K+ in margin in two quarters while raising distributor and channel-partner margins from 53% to 61%.

That system only held up because the data behind it was clean. Every stage, every salesperson and every product line had to roll up correctly before I trusted a single number in front of leadership, and building that reporting discipline at scale, across 3 regions and 20 product lines, is the same process-documentation habit a growing deal pipeline needs.

I run the same cycle end to end right now. At PriceKeel I operate the company's CRM and CPQ, forecast and pipeline reviews, and deal approvals, and I built the audit trail that gives Finance documented evidence for every pricing call. At Applied Materials I automate repetitive revenue analysis with Claude AI agents, the AI-tool comfort your posting calls out directly.

What I would bring to vCluster's Revenue Operations seat is someone who has already built the tooling a quote-to-cash process depends on, not just administered it, and who has closed a quantified margin gap inside a business running at real scale.
