Hiring Team, Happen Bank

Your posting asks for one person to own Paid Search, Paid Social and Display end to end for customer acquisition, not split across three specialists. That is the exact setup I ran at Plug Power: I owned \$100K/month paid budgets across Google Ads, Microsoft Ads, Meta and LinkedIn with full accountability for the mix, and bid optimization paired with structured landing-page and creative testing cut CPA 25% and cost per lead 50%.

The part of your listing that stands out is the cross-functional load: Legal, Product, Operations and Finance all have a say before a campaign in a regulated product can launch. I have run paid media inside that kind of scrutiny before. At Pixis I carried P&L for an 8-client, 8-person-team portfolio where every creative and audience change went through compliance review first, and still delivered 3x ROAS in a month for one account and a 40% ROAS lift across the portfolio once Amplitude and Tableau testing caught up. At Sensata I built the SQL and GA4 KPI frameworks that gave Legal and Product a shared view of a launch before it shipped, not after.

You also ask for hands-on use of AI tools to accelerate the work itself, with judgment about where human oversight still matters, not a line about being curious about AI. As Strategic Marketing III at Applied Materials, I automate recurring forecasting and reporting with agentic AI workflows built on Claude, while still carrying the P&L and revenue targets the automation feeds into. That is the same balance a regulated bank needs from a performance hire using AI on customer-facing campaigns.

I would want fifteen minutes to walk through how I would structure the first 90 days across Paid Search, Paid Social and Display here. Proof trail at adhi-growth.vercel.app/ref/happen-bank.
