Hiring Team, Moloco

Your posting asks for someone who can run Competitive Intelligence for an Executive and C-Suite audience with minimal day-to-day oversight once the scope is set. That is exactly the shape of the Bleeders and Leakers program I led at Sensata: I benchmarked 10+ competitors to drive +8% market share, then built the Power BI reporting infrastructure that surfaced \$433M in margin gaps for leadership to prioritize themselves.

The management-consulting background your listing calls out maps directly onto a project I ran outside my day job: I led a 5-consultant team sizing a market from 170 facilities down to a SAM of 28 for Safran, with ambiguous scope and limited starting data, and presented the recommendation straight to their leadership. I also carry the AdTech domain itself, not just the strategy skill set: at Pixis I held P&L for an 8-client paid-media portfolio, which is the business Moloco Ads actually runs.

On the AI side, your own platform is compound AI end to end, so I would rather show than claim fluency. As Strategic Marketing III at Applied Materials, I automate recurring competitive and market-intelligence analysis with agentic AI workflows built on Claude, the same habit I would bring to tracking CARA's competitive landscape.

I would want fifteen minutes to walk through how I would scope the first competitive-intelligence deliverable for your Ads Strategy team. Proof trail at adhithyabhaskar.vercel.app/ref/moloco.
