SUMMARY

Product-minded operator who managed the **user-versus-advertiser trade-off** running retail media ad formats for an 8-client adtech portfolio spanning Amazon Ads and Criteo. A full-funnel rebuild of one account's smart bidding, creative and feed quality turned it into 3x ROAS in a month. At Sensata I took sensor products from zero to one, owning a 100+-feature backlog with engineering across 3 regions and running 30+ customer interviews that reshaped the roadmap, plus the distributor and channel-partner margin work (53% to 61%) that is the closest analog to managing an external ad-tech vendor relationship. At Applied Materials I run AI agents built on Claude to automate repetitive analysis, and on SwipeHire, my own zero-to-one build, I designed 8+ A/B tests that lifted activation 25%.
