Hiring Team, Linktree

Before I ever led pricing strategy for a \$100M+ industrial business, I modeled three subscription pricing tiers for my own product from competitor benchmarks and willingness-to-pay signals. That is the same monetization muscle this Product Marketing Manager, Growth role is built on: translating conversion, retention and pricing elasticity into decisions the rest of the company can act on, not just a report on them.

At Sensata I got to run that muscle at scale. I led global pricing strategy for the Industrial BU, recovering \$700K+ in margin in two quarters and raising distributor margins from 53% to 61%, while carrying full P&L accountability. Before that, I owned go-to-market end to end for a new sensing product line, positioning, pricing, channel and launch, for \$2M+ in first-year revenue, then rewrote the messaging behind it so it converted 15% better. Pricing and positioning were never separate jobs for me; every packaging call I made had to hold up against 30+ customer interviews and real willingness-to-pay data, which is exactly the kind of cross-functional influence a monetization PMM has to earn, not assume.

I also know what it takes to build and defend a pricing model from nothing. SwipeHire's three subscription tiers came out of watching real users hit a paywall and deciding what they'd still pay for, the same instinct I imagine sits behind Linktree's next in-product monetization experiment. I bring that same habit of testing a story against real behavior to Applied Materials today, where I automate repetitive market analysis with Claude agents instead of doing it by hand, and I have hired and managed teams at every stop since Plug Power, so mentoring is not a new ask for me.

The fuller build, pricing tiers, positioning work and the launch numbers behind them, is at [adhi-product.vercel.app/ref/linktree](https://product.vercel.app/ref/linktree) if you want the detail behind any of this.
