SUMMARY

Shipped **an AI job-matching agent**, SwipeHire, zero-to-one on the OpenAI API. Decided what to build, cut, or double down on using 8+ A/B tests and 12+ user interviews, lifting activation 25%. Ran the 100+ feature roadmap at Sensata (releases 25% faster, time-to-market cut 20%), grounding every call in 30+ customer interviews and SQL/GA4 cohort data across 50K+ connected devices. Automates repetitive analysis today as Strategic Marketing III at Applied Materials with Claude AI agents, and brings an MS in Marketing Analytics to the data side of agent quality work.

EXPERIENCE

Strategic Marketing III, Applied Materials Jun 2026 - Present

- Sizes the **semiconductor market** in partnership with Sales, Engineering and Accounts, building the forecasting models that tell product and pricing where demand is headed next.
- Builds **competitive, value-based pricing** for a fast-growing market, forecasting its inflection points so roadmap bets stay ahead of demand, not behind it.
- Automates **repetitive analysis with AI agents built on Claude**, the same prototype-with-new-models habit a weekly-ship agent product runs on.

Product & Growth Marketing, Sensata Technologies Sep 2024 - Jun 2025

- Defined and owned the **product roadmap** for sensor solutions across automotive and industrial segments, managing a 100+ feature backlog with Engineering in Agile across 3 regions, accelerating releases 25% and cutting time-to-market 20%.
- Ran **30+ customer interviews** with OEMs and distributors to find where the product fell short, turning that signal into fixes that raised CSAT 22%, the same trace-reading habit an agent's quality loop runs on.
- Built **KPI frameworks in SQL and GA4** across 50K+ connected devices, isolating high-intent cohorts and adoption signals that moved the metrics and lifted feature adoption 18%.
- Owned **GTM for new sensing products** across North America and Europe end to end (positioning, pricing, channel, launch), driving $2M+ in first-year revenue.
- Turned **technical features into customer value propositions** a buyer could act on immediately, lifting conversion 15% on priority launches.

Pricing Lead, Sensata Technologies Jul 2025 - May 2026

- Built a BU-wide **Power BI price-increase model** flagging line items where a pricing change could lift profitability more than 50%, the same hypothesis-to-metric loop a hill-climbing cycle runs.
- Drove **+12% YoY revenue and +8% market share** via price realignment informed by competitive benchmarking across 10+ players, briefing executives to win buy-in for the change.

Digital Marketing Manager, Plug Power Oct 2022 - Jul 2023

- Ran **15+ A/B tests** across Paid Search and Paid Social, delivering -25% CPA, a prototype-test-measure loop built to ship weekly, not quarterly.
- Automated the **Mar-Tech stack** (Salesforce, Adobe Analytics, GA, Google Tag Manager) for closed-loop reporting, the same instrumentation a product's metrics need to actually move.
- Raised **organic search visibility 35%** by closing keyword-strategy gaps and building SEO partnerships.

Customer Success Manager, Pixis (AI Platform) Jul 2021 - Sep 2022

- Fed **voice of customer straight to product**, reporting recommendations to senior management from an 8-client, $15K-$90K/month portfolio carrying P&L and revenue targets.
- Cut **client churn 50%** through proactive account strategy and channel diversification, deciding what to double down on once the data showed where accounts were slipping.
- Used **Amplitude and Tableau** on user behavior across 30+ campaigns, lifting campaign ROAS 40%, the same experiment-and-measure loop that feeds eval-set decisions.

Senior Digital Marketing Analyst, GenY Medium Jan 2020 - Jun 2021

- Lifted **a B2B e-commerce startup's conversion rate 36%** and revenue 25% by rebuilding dashboards and running database audits on funnel data.
- Delivered **16x ROAS** for D2C e-commerce brands by rebuilding Google Merchant Center and Meta catalog feeds.

PROJECTS

SwipeHire

- Shipped **an AI job-matching agent** (Python, OpenAI API, React) zero-to-one: wrote the PRD, scoped the MVP, and shipped auto-tailored resumes and intelligent candidate-role matching to 50+ early users.
- Decided **what to build, cut, or double down on** using 8+ A/B tests and 12+ user interviews, the same ship-weekly feedback loop an agent product runs on, lifting activation 25%.
- Defined **the ICP** and ran competitor teardowns (Jobright and others), crafting positioning and modeling 3 subscription pricing tiers from willingness-to-pay signals.
