Hiring Team, Tanium

Your posting asks for someone to own global paid search and video programs across Google and Microsoft end to end, strategy through daily budget pacing. At Plug Power I ran exactly that scope: Paid Search on Google Ads and Microsoft Ads plus Paid Social, with quarterly and monthly budget planning and pacing on \$100K/month across multiple business units, and bid optimization that cut CPA 25%.

The measurement half of your role matters just as much. I built the dashboards and reporting cadence that gave leadership a transparent read on performance, and tracked conversion events across Salesforce, Adobe Analytics, GA and Google Tag Manager so the data held up from ad click to pipeline, the same ad-platform-to-CRM troubleshooting your posting calls out. I have not worked inside Marketo specifically, but Pardot and Salesforce carried that same lead-to-CRM handoff at Plug Power, and GA4 has been part of my stack since then.

The cross-functional pieces of this role are not new either. I partnered with web and creative teams on 15+ landing-page A/B tests, and worked with the SEO side of the house to share keyword insight, raising organic visibility 35% while paid search ran alongside it, the same organic-paid alignment your posting asks for.

At Applied Materials today I automate my own recurring analysis and reporting with AI agents built on Claude rather than rebuilding the same report every cycle. It's the same instinct behind staying ahead of the agentic and AI-driven bidding tools your posting flags as the next wave in paid search. Proof trail at adhi-growth-ai.vercel.app/ref/tanium.
