Hiring Team, Intuitive

Your posting asks for pricing science that holds up in front of a price council: elasticity testing, willingness-to-pay analysis, and the dashboards and models that back an executive recommendation. That is the exact motion I ran at Sensata leading the Bleeders and Leakers program, an elasticity- and willingness-to-pay-driven deal review that recovered $700K plus in margin in two quarters and lifted distributor margins from 53% to 61% in the same stretch.

I built the FY2026 Bleeders and Leakers Power BI dashboard behind that program: 1,200 pricing opportunities tracked against a $627M target across 3 regions, 4 product families and 20 product lines, surfacing $433M in margin gaps for leadership to prioritize by salesperson and product line. That same dashboard fed the executive materials and AP26 revenue models I built with senior executives and Finance, the kind of price-council-ready output a Director of Pricing and Customer Finance would expect from this seat.

I have since built the end-to-end side of that work myself. PriceKeel, the company I founded, reads a live discount exception inside the deal platform and recommends a guardrail learned from a company's own closed-won and closed-lost deals, the same willingness-to-pay signal your posting names directly. I own that model from design through the audit trail Finance reviews, which is the end-to-end pricing-analytics ownership your posting already treats as sufficient on its own.

At Applied Materials I build competitive, value-based pricing and inflection-point forecasting for a fast-growing semiconductor portfolio, automating the repetitive side of that analysis with Claude AI agents so the judgment calls get more time. A portfolio spanning capital systems, instruments, accessories, service and digital offerings is a wider scope than any single program I have run, and it is exactly the kind of scope I want next. Proof trail at adhi-pricing-ai.vercel.app/ref/intuitive.
