

PITCH DECK | IMPIRICUS SENIOR PRICING ANALYST

One seat here owns deal-by-deal quotation review, DealHub as the system of record, dynamic pricing across product lines, and the governance trail that keeps it all auditable. I have already run every piece of that, just not all under one product yet.

Deal-level pricing judgment, CPQ system ownership and pricing-governance discipline from someone who has built the audit trail, not just filled out the quote.

\$700K+ margin recovered in 2 quarters via deal-by-deal quotation review at Sensata

53% to 61% distributor margin lift from repriced discount logic

CRM + CPQ configuration and audit trail owned end to end, founder of PriceKeel

1,200 opportunities tracked against a \$627M target across 3 regions, 4 product families, 20 lines

Claude AI agents automating recurring pricing analysis at Applied Materials

This posting is really three jobs held by one person: deal support, DealHub ownership and pricing governance, **across three product lines at once.**

What losing that discipline runs into

A deal desk without deal-by-deal review does not fail loudly. It fails as a quote that got approved on last quarter's assumptions, a CPQ workaround nobody documented, and a dashboard where nobody can say why a segment's realization slipped.

Sales, Deal Desk and Finance all touch the same quote, so a gap in system ownership or data hygiene becomes everyone's guessing game at the next approval, not just one team's problem.

The fix is not another spreadsheet. It is someone who treats quotation, system configuration and governance as one connected discipline instead of three separate jobs.

What I have already run

At **PriceKeel**, I set up and run the CRM, CPQ configuration and the audit trail myself, the same system-ownership and governance loop this role holds for DealHub.

At **Sensata**, I owned deal-by-deal quotation review inside the Bleeders and Leakers program and built the Power BI dashboard that made 1,200 pricing opportunities auditable by segment.

Both mean I have sat on the quote-approval side and the system-configuration side of the same gate, not just one or the other.

A Senior Pricing Analyst who owns deal support, is the DealHub expert, builds dynamic pricing models and assists pricing governance is describing this exact loop: review the deal, configure the system, keep the governance trail honest.

What the Senior Pricing Analyst opening asks for, and where the proof already sits.

What the role covers

Manages day-to-day pricing support for individual transactions, including investigation into previous deal terms and quotation approaches.

Acts as the primary expert on the CPQ platform, controlling system management and converting new business-model requirements into system setup.

Builds and maintains inventory-driven dynamic pricing models, examining supply-and-demand across product launch phases.

Helps ensure pricing compliance across quotes, service agreements and discount limitations, and keeps CRM pricing data clean.

My Proof

Deal-by-deal quotation review: owned quotation approaches and prior-deal-term investigation inside the Bleeders and Leakers program at Sensata, recovering \$700K+ in margin in 2 quarters.

CPQ system ownership: set up and run PriceKeel's own CRM and CPQ configuration end to end, the same system-of-record ownership this seat holds for DealHub.

Dynamic, inventory-based pricing: build inflection-point forecasting models at Applied Materials that track a launching product's supply-and-demand curve, and modeled demand elasticity with R-based regression on my own pricing project.

Governance and CRM data quality: built the audit trail that gives Finance an explainable record behind every discount exception at PriceKeel, and kept the Mar-Tech and CRM stack clean for closed-loop reporting at Plug Power.

Bleeders and Leakers: **make every quote auditable before it gets to a segment view.**

Built as a BU-wide Power BI system covering 1,200 pricing opportunities against a \$627M target across 3 regions, 4 product families and 20 product lines, with profitability by segment and approval timeframes checked before leadership set the next quarter's targets.

\$700K+

Margin Recovered, 2 Quarters

Deal-by-deal quotation review against competitive gaps and each customer's own deal history, the same investigation this seat runs on every transaction.

53% to 61%

Distributor Margin Lift

Repriced the channel logic and documented it for governance review, so the new discount limits held past the first quarter.

\$433M

Margin Gaps Surfaced

Every gap traced to a specific deal record by salesperson and product line, the same segment-level detail a cross-product dashboard needs.

At PriceKeel that same instinct became the operating model: I run the CRM, CPQ configuration and the audit trail myself, so the quote and the governance record are never two different stories.

What the first month owning pricing support at Impiricus looks like.

WEEK 1 Learn DealHub and the governance rules Sit with the Pricing Lead and Pricing Strategy Manager to walk the current DealHub setup, discount-approval limits and CRM data model, and shadow one deal-by-deal quotation review end to end. ----- Why first: the same instinct that had me learn PriceKeel's own CPQ configuration before building anything on top of it.	WEEK 2-3 Own a dynamic-pricing and dashboard cycle Take ownership of one product line's dynamic-pricing model and its revenue-realization dashboard end to end: confirm the supply-and-demand assumptions, build the report, and present profitability by segment at the next review. ----- Why now: the same segment-by-segment discipline that made the Bleeders and Leakers dashboard usable in a leadership review.	WEEK 4 Tighten CRM data quality and the governance trail Clean up one pricing/deal data field in CRM, document the discount-limitation logic behind it, and flag one non-standard contract pattern worth a governance review before the next quote cycle. ----- Why this fast: a governance trail only earns its keep if it gets re-checked every cycle instead of trusting last quarter's setup.
---	---	---

CLOSE

You are hiring someone to keep deal support, DealHub and pricing governance honest across every transaction. I have already built that discipline, from both sides of the quote.

The core proof is Sensata: a Power BI system tracking **1,200 pricing opportunities against a \$627M target**, distributor margins lifted **from 53% to 61%**, and \$700K+ in margin recovered in 2 quarters through deal-by-deal quotation review.

What is harder to find is someone who has also spent the last several months owning the CRM, CPQ configuration and audit trail for his own company's deal flow. **I built that at PriceKeel**, so the system ownership and governance discipline this role runs is not something I would need to learn on the job.
