

PITCH DECK | NAVAN SENIOR DEAL DESK ANALYST

Navan needs a critical enabler of deal formation who can minimize cycle time without giving up margin. I have already run that trade at \$700K+ scale.

Deal structuring, CPQ configuration and revenue-recognition-ready deal reviews from someone who has priced the exception, not just routed it.

\$700K+ margin recovered in 2 quarters, deal by deal

53% to 61% distributor margin lift via sophisticated-deal restructuring

\$627M pipeline tracked, 1,200 opportunities, \$433M in gaps surfaced

PriceKeel - founder, runs CRM, CPQ and deal-approval workflow end to end

Claude AI agents - automates recurring pricing analysis at Applied Materials

The posting is direct: be the enabler of deal formation and execution **without slowing the sales cycle down.**

What losing that discipline runs into

A deal desk without a real gatekeeper does not fail loudly. It fails as a non-standard request nobody structured in time, a discount that slips past an early checkpoint, and a revenue-recognition question that surfaces after the deal is already signed.

Navan's own posting names the cross-functional surface area directly: legal, contracts, sales operations, order management, revenue, finance and product management all touch the same deal, so a gap in deal-review judgment becomes everyone's problem.

The fix is not a slower process. It is someone who has already made the pricing and structuring call on live deals, fast enough that sales cycle time does not stretch.

What I have already run, at smaller scale

At **Sensata**, I led the Bleeders and Leakers program: deal-by-deal negotiation directly against competitive gaps and customer willingness to pay, recovering \$700K+ in margin in 2 quarters without stalling deals in review.

At **PriceKeel**, I built the CRM, CPQ configuration and deal-approval workflow myself, including the guardrail that catches a non-standard deal request before it reaches final review.

Both mean I have sat on the pricing side of a deal review, structuring sophisticated terms rather than only enforcing a checklist.

A Senior Deal Desk Analyst who drives best practices via deal reviews and early checkpoints, while optimizing revenue, profitability and market share, is describing this exact loop: structure the deal, enforce the standard, and keep the cycle moving.

What the Senior Deal Desk Analyst opening asks for, and where the proof sits.

What the role covers

- "Be a critical enabler of deal formation and execution, minimizing sales cycle times while optimizing revenue, profitability, and market share."*
- "Work cross functionally across legal, contracts, sales operations, order management, revenue, finance and product management."*
- "Assist with non-standard deal requests, structuring sophisticated deals, ensuring revenue recognition requirements are handled."*

My Proof

- Deal formation and execution:** ran deal-by-deal negotiation against competitive gaps and willingness to pay in Sensata's Bleeders and Leakers program, recovering \$700K+ in margin in 2 quarters without widening the sales cycle.
- Cross-functional deal review:** partnered with senior executives, Finance and product groups on AP26 revenue models and multimillion-dollar customer quotes, the same legal-finance-product loop this seat runs at Navan.
- Non-standard deals and revenue recognition:** built PriceKeel's guardrail engine to flag a non-standard deal request pre-approval, and the audit trail that keeps the decision revenue-recognition-ready for Finance.
- Metrics and visibility across geographies:** built a Power BI system Finance and leadership audited against a \$627M target across 3 regions, surfacing \$433M in margin gaps by salesperson.

Bleeders and Leakers: the deal-desk discipline behind a \$700K margin recovery.

Built as a BU-wide Power BI system covering 1,200 pricing opportunities against a \$627M target across 3 regions, 4 product families and 20 product lines, with every margin gap traced to a specific deal record before leadership prioritized which ones to fix.

\$433M

Margin Gaps Surfaced

Each gap traced to a salesperson and product line, the deal-level detail a deal review needs to be actionable, not just visible.

53% to 61%

Distributor Margin Lift

Restructured sophisticated multi-party discount terms, then documented the logic so Finance and legal could enforce it.

\$700K+

Margin Recovered, 2 Quarters

Recovered deal by deal, negotiating directly against competitive gaps and each customer's own willingness to pay.

At PriceKeel that same instinct became the system itself: I run the CRM, CPQ and deal-approval workflow, then the audit trail behind it, so the deal, the quote and the ledger tell the same story.

What the first month on Navan's Deal Desk looks like.

WEEK 1 Learn Navan's licensing and pricing models Sit with sales, legal, contracts, sales operations, order management, revenue and finance to walk the current deal-structuring and quoting flow, Navan's CPQ setup and the standard business practices deal reviews enforce today. ----- Why first: the same instinct that had me learn PriceKeel's own deal flow before building anything on top of it.	WEEK 2-3 Own a deal-review cycle Take ownership of deal structuring and quoting support for a live cohort of deals, negotiating directly with customers as needed while flagging non-standard requests at the earliest checkpoint instead of at signature. ----- Why now: the same deal-by-deal negotiation discipline behind the Bleeders and Leakers recovery.	WEEK 4 Improve visibility across geographies Identify one recurring gap in business-visibility metrics or deal financials and build the tracking for it, the same operating habit that automates pricing analysis with Claude AI agents today. ----- Why this fast: enforcing a standard practice is only credible once someone has run the deal by hand first.

CLOSE

You are hiring someone to be the critical enabler of deal formation and revenue integrity. I have already run that trade, at \$700K+ scale.

The core proof is Sensata: **\$700K+ in margin recovered in 2 quarters** through deal-by-deal negotiation, distributor margins restructured **from 53% to 61%**, and a Power BI system that tracked 1,200 opportunities against a **\$627M target** across geographies, all run cross-functionally with sales, finance and senior executives.

What is harder to find is someone who has also built the CPQ and deal-approval system from the other side of the desk. **I built that at PriceKeel**, so the quote-to-contract and non-standard-deal discipline this role owns is not something I would need to learn on the job.
