Hiring Team, Checkr

Your posting asks for someone who can own Mid-Market and SMB pricing with Sales day to day, then step into the harder Enterprise deals and show the profitability math behind them. I ran that exact split at Sensata leading the Bleeders and Leakers program: deal-by-deal negotiation against competitive gaps and each customer's own willingness to pay, which recovered \$700K plus in margin in two quarters. That is a Discount Framework built and governed, not a policy written once and forgotten.

I have since built the tooling side of that same desk. PriceKeel, the company I founded, reads a live discount exception inside the deal platform and recommends a guardrail learned from a company's own closed-won and closed-lost history, then logs the audit trail Finance needs to sign off on it. I set up and run its CRM, CPQ configuration, deal approvals and forecast-and-pipeline reviews myself, so the "build the data and infrastructure with AI" part of this role is not a new muscle for me, it is the company I run.

The Enterprise side of the job maps to work I have already done with senior leadership. At Sensata I partnered with executives and Finance on AP26 revenue models and multimillion-dollar customer quotes, and built the FY2026 Bleeders and Leakers Power BI dashboard that tracked 1,200 pricing opportunities against a \$627M target across three regions, surfacing \$433M in margin gaps by salesperson so leadership could prioritize instead of guess. Raising distributor and channel-partner margins from 53% to 61% in the same program came from writing the new discount logic clearly enough that Finance could audit it on sight, the same playbook-and-memo habit your team needs across Sales, RevOps and Accounting.

Right now, as Strategic Marketing III at Applied Materials, I automate repetitive pricing and forecasting analysis with Claude AI agents, which is the instinct behind your push to build the next generation of Deal Desk with AI tools. I would bring someone who has already run both sides of a quote, the seller's and the approver's, not someone learning CPQ on the job. Proof trail at adhi-pricing-ai.vercel.app/ref/checkr.
