Hiring Team, Chainguard

Your posting describes quote-to-signature support end to end: pricing approvals, order forms, CPQ and CLM administration, and the data integrity that keeps Salesforce, Roadrunner and Ironclad telling the same story. I run that exact loop today as founder of PriceKeel, where I set up and administer the CRM and CPQ configuration myself, including the price books and the deal-approval workflow that routes a non-standard discount before it closes.

The governance side is not new either. I built the audit trail that gives Finance an explainable record behind every discount exception at PriceKeel, so a non-standard deal has a documented reason, not just an approved status. At Sensata I ran deal-by-deal quotation review inside the Bleeders and Leakers program, recovering $700K plus in margin in two quarters and raising distributor and channel-partner margins from 53% to 61%, then documenting the new discount logic so it held past the first quarter's review. I also negotiated multimillion-dollar customer quotes directly with Sales and Finance, the same non-standard deal structure your team flags for pricing insight before it goes to signature.

I would bring the same discipline to a quote queue running at month- and quarter-end pace. I built the FY2026 Bleeders and Leakers Power BI dashboard tracking 1,200 pricing opportunities across 3 regions, 4 product families and 20 product lines, which is the same segment-by-segment visibility a Deal Desk function needs to keep moving without losing track of a single blocker. Clean CRM and CPQ data was never optional in that system, it was the thing that made the dashboard trustworthy in the first place.

What I have not done is call it Deal Desk by name, and I have not touched Roadrunner or Ironclad specifically. What I have done is own the quote-to-cash motion, the system configuration, and the governance trail behind it, on my own company's deal flow and on a multi-$100M industrial book of business. Proof trail at adhi-pricing-ai.vercel.app/ref/chainguard.
