

PITCH DECK | AIRWALLEX MANAGER, PERFORMANCE MARKETING, PAID SEARCH

# Most global SEM programs run one keyword list translated into ten languages. The markets that actually convert are the ones where the keyword list got rebuilt, not translated.

*Keyword-level bid strategy, market-by-market testing discipline, and a budget-to-ROI loop already built at six-figure monthly scale.*

**\$100K/month** - Google Ads and Microsoft Ads (Bing) budgets owned end to end at Plug Power

**CPA -25% / Wasted spend -15%** - from keyword research and bid strategy, not bigger budgets

**8 clients, non-English markets** - paid search and PPC localized market by market at Pixis

**15+ A/B tests, 50+ campaigns** - ad copy, landing page and bidding tests at Plug Power

**AI agents on Claude** - in production use today, Applied Materials

## A global SEM strategy is not one keyword list in ten languages. It is **a market-by-market rebuild wearing one budget line.**

### What that actually requires

Rebuilding keyword sets and bid strategy per market instead of translating one list, because search behavior does not carry over word for word.

Running A/B tests on ad copy, landing pages and bidding approaches in each market, then rolling the wins back into the global strategy instead of letting every market drift on its own.

Keeping SEM budgets and ROI reporting legible to leadership across all of it, so a global program does not turn into ten local ones nobody can compare.

### What I have already built at that layer

Localized **paid search and PPC for 8 client accounts** including non-English markets at Pixis, rebuilding keyword sets and bid strategy per market rather than translating one list.

Ran **15+ A/B tests** on ad copy, landing pages and bidding across 50+ campaigns at Plug Power, closing the keyword-strategy gaps those tests surfaced.

Built the pacing plans, financial forecasts and leadership reporting behind **\$100K/month in SEM budgets**, keeping spend accountable to CPA and pipeline, not platform dashboards.

**The through-line: I do not run one SEM playbook and hope it travels. I rebuild it market by market, test it, and still keep one number leadership can read.**

# What the posting is asking for, and where the proof already sits.

## What the role covers

- "Develop and implement a comprehensive global SEM strategy aligned with business goals and regional priorities."*
- "Plan, execute, and optimize paid search campaigns (Google Ads, Bing, etc.) across multiple geographies."*
- "Design and run A/B tests for ad copy, landing pages, and bidding strategies to continuously improve campaign results."*
- "Manage SEM budgets, forecast spend, and ensure optimal allocation of resources."*

## My proof

- Plug Power, \$100K/month:** owned Google Ads and Microsoft Ads (Bing) budgets end to end, building the pacing and financial forecasts leadership approved every cycle.
- Pixis, non-English markets:** localized paid search and PPC for 8 client accounts across international markets, rebuilding the keyword set and bid strategy per market.
- Plug Power, testing roadmap:** 15+ A/B tests on ad copy, landing pages and bidding across 50+ campaigns, the same test-and-roll-back discipline this role runs on.
- Plug Power, budget allocation:** keyword and audience tuning trimmed wasted spend 15% on the same budget, freeing dollars for the terms already converting.

# Plug Power: keyword-level bid strategy that cut CPA 25%, not a bigger budget.

Built as the pacing, bid-testing and CRM-attribution system behind Google Ads and Microsoft Ads (Bing) search, not run as one flat budget line.

|                                                                                                                                                                              |                                                                                                                                                                   |                                                                                                                                                                           |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <div><div>\$100K/mo</div><div>SEM Budget Owned</div><div>Google Ads and Microsoft Ads (Bing), planned and paced against leadership-approved financial forecasts.</div></div> | <div><div>25% / 15%</div><div>CPA Cut / Wasted Spend Cut</div><div>From keyword research and bid strategy testing, not raising bids across the board.</div></div> | <div><div>15+ / 50+</div><div>A/B Tests / Inbound Campaigns</div><div>Ad copy, landing page and bidding tests that also lifted organic search visibility 35%.</div></div> |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

The same rebuild-per-market instinct shows up at Pixis: paid search and PPC localized for 8 client accounts, several in non-English markets, alongside a 40% ROAS lift from Amplitude and Tableau-driven audience work.

# What the first month owning Airwallex's global SEM strategy would look like.

|                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

CLOSE

## **Airwallex needs a global SEM strategy that survives contact with a market that does not search the way English does. I have already rebuilt that keyword by keyword.**

The core proof is Plug Power together with the market-localization work at Pixis: a [keyword research and bid-strategy discipline](#) that cut CPA 25% and wasted spend 15%, and the [market-by-market rebuild](#) that localized paid search and PPC for 8 client accounts across non-English markets.

What's harder to find is someone who has run that discipline at six-figure monthly scale and can also forecast the budget and report the ROI leadership needs to keep funding it, the financial forecasting and P&L work carried today at Applied Materials and at Sensata.
