Hiring Team, Evlo AI

At Plug Power I automated our own lead flow end to end: wired WordPress to Pardot, then rebuilt the Salesforce, Adobe Analytics and Google Tag Manager stack for closed-loop reporting. That cut cost per lead 50% and gave the team one clean view from first click to closed deal, the same marketing-automation-plus-CRM ownership your posting is asking one Marketing Manager to carry.

Channel decisions get made with data, not instinct, in my experience. I ran $100K/month paid budgets across Google Ads, Microsoft Ads, Meta and LinkedIn at Plug Power, A/B testing bids and creative down to a 25% cut in CPA, and raised organic visibility 35% by closing keyword gaps with SEMRush and Moz. At Pixis I managed an 8-client, $15K-$90K-per-month portfolio and delivered 3x ROAS for one brand through a shopping feed cleanup and smart-bidding rebuild, the same discipline a six-figure-plus budget needs regardless of account size.

Messaging is the other half of the seat. At Sensata I owned positioning for a new sensor line, turning technical specs into customer value language that lifted conversion 15% on priority launches, and the KPI frameworks I built in SQL and GA4 found the high-intent cohorts that made the copy land. I also automate my own reporting with AI agents built on Claude at Applied Materials, the habit that keeps a hands-on marketing seat from drowning in manual QA.
