SUMMARY

Product manager who **launched a consumer product** people chose to use, then iterated it with data, not opinion. SwipeHire went from a blank PRD to 50+ onboarded users, with 8+ A/B tests and 12+ interviews lifting activation 25%. At Sensata I carried P&L and revenue targets and shaped multimillion-dollar customer quotes, the same where-money-moves-and-a-mistake-is-costly judgment a credit account's approval and line decisions run on, while partnering across Engineering, Sales and Accounts at Applied Materials to turn fragmented signals into one view. I ship AI with a realistic read on its limits, building Claude agents to automate analysis rather than chase a headline feature.

EXPERIENCE

Strategic Marketing III, Applied Materials Jun 2026 - Present

- Built **forecasting and market-sizing models** across multiple product groups, partnering with Engineering and Sales to turn fragmented field and technical signals into one prioritized view, the same cross-functional alignment a credit product needs across engineering, data and risk.
- Modeled **competitive, value-based pricing** for a fast-growing market, forecasting inflection points so pricing decisions keep pace with demand instead of trailing it.
- Runs **AI agents built on Claude** to automate repetitive analysis, shipping AI with a realistic read on what it can and cannot do rather than chasing a headline feature.

Product & Growth Marketing, Sensata Technologies Sep 2024 - Jun 2025

- Owned the **product roadmap and a 100+-feature backlog** for sensor solutions, running Agile with Engineering across 3 regions to decide what shipped each sprint, cutting time-to-market 20% and accelerating releases 25%.
- Ran **30+ structured interviews** with OEMs and distributors, turning what customers said into a prioritized set of product changes that raised CSAT 22%, the same customer-chooses-to-use signal a consumer credit product lives or dies on.
- Built **KPI frameworks in SQL and GA4** across 50K+ connected devices, isolating the adoption and retention signals that lifted feature adoption 18%, the same approval-to-activation funnel math a credit line experience gets measured on.
- Drove **GTM for new sensing products** end to end (positioning, pricing, channel, launch) across North America and Europe, with no existing playbook, driving $2M+ first-year revenue.
- Equipped 50+ reps with **sales enablement** material and aligned Engineering, Sales and regional stakeholders behind one roadmap, lifting win rates 30%.

Pricing Lead, Sensata Technologies Jul 2025 - May 2026

- Carried **P&L and revenue targets** for a multi-$100M industrial business, driving **+12% YoY revenue** by turning competitive benchmarking across 10+ players into a price-realignment model.
- Shaped **multimillion-dollar customer quotes** with senior executives, the same money-moved-and-errors-cost-significantly judgment a credit account's approval and line-management decisions run on daily.

Digital Marketing Manager, Plug Power Oct 2022 - Jul 2023

- Ran **15+ A/B tests** across paid search and social, translating bid-optimization experiments into a 25% CPA cut and a 20% conversion lift from customer-research-informed targeting.
- Automated the **Mar-Tech stack** (Salesforce, Adobe Analytics, GA, Google Tag Manager) for closed-loop reporting, cutting manual reconciliation work across the funnel.

Customer Success, Pixis (AI Platform) Jul 2021 - Sep 2022

- Cut **client churn 50%** through proactive account strategy and vertical playbooks across an 8-client portfolio with per-client budgets of $15K-$90K/month, carrying P&L targets directly.
- Fed **voice-of-customer insights** into product and reported recommendations to senior leadership, the same customer-signal loop a credit product's rewards and servicing experience depends on to know what to build next.

Senior Digital Marketing Analyst, GenY Medium Jan 2020 - Jun 2021

- Shaped **SQL-driven dashboards** that lifted a B2B e-commerce startup's conversion rate 36% and revenue 25%, improving data accessibility 30% through database and SEO audits.
- Delivered **16x ROAS** for D2C e-commerce brands by rebuilding Google Merchant Center and Meta catalog feeds, the same full-funnel ownership instinct behind owning a product end to end.

PROJECTS

SwipeHire

- Wrote the **PRD and scoped the MVP** for SwipeHire, an AI job-matching platform (Python, OpenAI API, React) built zero-to-one from problem definition to launch, onboarding 50+ early users who actively chose to keep using it.
- Owned the **activation funnel** end to end: instrumented GA4/GTM event tracking, then ran 8+ A/B tests and 12+ user interviews that lifted activation 25%.
