PITCH DECK | AISTETH CHIEF OF STAFF TO THE FOUNDER AND CEO

A Chief of Staff needs an operating rhythm that already works, not one to invent on the job. I run one today, for my own company, with the fundraising materials to prove it.

A $700K+ margin program built from zero at Sensata, and the CRM, pipeline reviews and investor updates I run today at PriceKeel.

- **Founder, right now**: PriceKeel's operating rhythm, built and run end to end
- **$700K+ recovered** from a margin program built with no existing tool
- **Investor updates & board materials** owned for PriceKeel's first raise
- **5-consultant team led** on a market-entry study presented to leadership
- **AI agents built on Claude** automating my own recurring analysis

WHY THIS DECK EXISTS

The job is not "manage the calendar." It is running the operating rhythm that turns decisions into execution across teams that do not report to you.

What that actually requires

An operating rhythm, OKRs, weekly leadership reviews, board packs, that runs whether or not the founder is in the room.

Fundraising support: a data room, pitch materials and investor updates that survive due diligence.

The trust to coordinate across functions that do not share a reporting line, and turn decisions into execution.

What I have already run

At **PriceKeel**, I built and run the company's full operating rhythm today: CRM/CPQ, pipeline reviews, deal approvals, and the investor updates behind our first round.

At **Sensata**, I turned a vague margin mandate into the Bleeders and Leakers program, a board-ready case that recovered $700K+ in two quarters.

At **Applied Materials**, I coordinate Sales, Engineering and Accounts into one view, the cross-functional-trust muscle this role runs on.

> **The through-line: every operating rhythm I have built runs without me needing to be in the room, because the process, not the person, carries it.**

THE MANDATE, MAPPED

What the posting asks for, and where the proof already sits.

What the role covers

> *"Run the operating rhythm: OKRs/KPIs, weekly leadership reviews, monthly business reviews, board pack."*

> *"Support fundraising and investor relations: data room, pitch materials, investor updates, due diligence."*

> *"Coordinate across Sales, Clinical, Regulatory, Product, Hardware, ML teams to turn decisions into execution."*

My proof

Operating rhythm, right now: run PriceKeel's OKRs, pipeline reviews and deal approvals end to end, with no existing process to inherit.

Fundraising support, PriceKeel: own the investor updates and board-ready materials behind the company's first round today.

Cross-functional coordination, Applied Materials: turn Sales, Engineering and Accounts input into one view leadership acts on, with no authority over any of them.

Board-ready case, Sensata: built the Bleeders and Leakers program and presented AP26 revenue models directly to senior executives.

THE PROOF, IN DEPTH

Build the rhythm, run the fundraise, then turn the decision into execution.

The same three-step pattern, run at PriceKeel and Sensata: build the cadence that keeps everyone aligned, prepare the materials the next funding or leadership conversation needs, then make sure the decision actually ships.

$700K+ Recovered

Board-Ready Case, Sensata

1,200 opportunities ranked against a $627M target, then closed through direct negotiation, no existing tool to start from.

Live Fundraise

Investor Relations, PriceKeel

Investor updates, pitch materials and the data room behind the company's first round, built and run end to end.

5-Consultant Team Led

Leadership Presentation, Safran

Market-entry recommendation presented directly to a client's leadership after sizing a market across 4 verticals.

None of these were a plan that sat in a deck. Each one became a working cadence, a board-ready case, or a decision that actually shipped.

FIRST 30 DAYS

What the first month as AiSteth's Chief of Staff looks like.

WEEK 1

Map the operating rhythm and the CEO's priorities

Learn the current OKR, leadership-review and board-pack cadence, and build the same priority-and-follow-through system PriceKeel runs on.

Why first: the rhythm has to exist before anything else can run on top of it.

WEEK 2-3

Support the fundraising workstream

Build or refresh the data room and investor-update materials, applying the same board-ready discipline behind Sensata's Bleeders and Leakers case.

Why now: Series A materials need a long runway to tighten before diligence starts.

WEEK 4

Turn one cross-functional decision into execution

Pick one Sales, Clinical, Regulatory or Product decision that has stalled, and apply the Applied Materials coordination model to actually move it.

Why this fast: a bias for action without waiting on perfect data, the same call made at every seat so far.

CLOSE

You are hiring someone to run the operating rhythm behind a founder. I am running one for my own company right now, with the materials to prove it.

The rhythm half: **PriceKeel's OKRs, pipeline reviews and deal approvals**, built and run end to end, and the **investor updates** behind its first fundraising round.

The execution half: **$700K+ recovered in two quarters** at Sensata by turning an ambiguous mandate into a board-ready case, the exact "decisions into execution" this role asks for.
