PITCH DECK | ANAKIN FOUNDER'S OFFICE, PRODUCT AND GTM

Not a strategy-only seat. I build the product, run the GTM, and own the number myself, because that is exactly what I do at my own company right now.

A B2B SaaS product built end to end at PriceKeel, and a 3x ROAS full-funnel fix delivered in a single month at Pixis.

- **B2B SaaS product built end to end**: PriceKeel, product, CRM/CPQ, fundraising
- **$700K+ recovered** from a GTM/revenue program built with no existing tool
- **3x ROAS in one month** from a full-funnel growth restructure, not a single lever
- **SwipeHire shipped 0-to-1**: PRD to 50+ users, hands-on, no delegation
- **AI agents built on Claude** automating my own recurring analysis

WHY THIS DECK EXISTS

The job is not "coordinate across teams." It is connecting product development to GTM execution and owning the outcome yourself.

What that actually requires

Hands-on ownership of execution, not delegation and coordination, from problem definition to measurable business impact.

Growth experiments that become repeatable playbooks, not one-off campaigns.

GTM and revenue programs that are data-backed and tied to a real business outcome.

What I have already run

At **PriceKeel**, I built a B2B SaaS product end to end: the guardrail engine's design, the CRM/CPQ, and the pipeline connecting product to GTM, with no delegation layer.

At **Pixis**, I turned an underperforming account into 3x ROAS in one month through a full-funnel restructure, not a single-lever tweak.

At **Sensata**, I converted a vague margin mandate into a structured execution plan that recovered $700K+ in two quarters.

> **The through-line: every initiative I have run started as an ambiguous problem with no playbook, and ended as a measurable outcome I owned myself, not one I coordinated from the side.**

THE MANDATE, MAPPED

What the posting asks for, and where the proof already sits.

What the role covers

> *"Lead 0 to 1 and 1 to N initiatives that connect product development with growth and customer acquisition."*

> *"Drive experiments across landing pages, outbound/ABM, conversion optimization, and paid acquisition... build repeatable playbooks."*

> *"Drive cross-functional GTM initiatives focused on funnel efficiency, pipeline management, and revenue conversion."*

My proof

0-to-1 product, SwipeHire: wrote the PRD, scoped the MVP, shipped it to 50+ early users myself, then ran 8+ A/B tests on the funnel.

Repeatable growth playbook, Pixis: full-funnel restructure (feed cleanup, smart bidding, creative refresh, lookalikes) that delivered 3x ROAS in one month, not a one-off campaign.

GTM and revenue program, Sensata: built the Bleeders and Leakers dashboard and closed it into $700K+ recovered in two quarters.

Product-to-GTM pipeline, PriceKeel: CRM/CPQ and deal approvals built so product decisions connect directly to revenue.

THE PROOF, IN DEPTH

Build the product, run the growth experiment, then tie it to a revenue number.

The same three-step pattern, run at PriceKeel, Pixis and Sensata: ship something from zero, find the one lever that actually moves the number, then connect it back to a measurable business outcome.

50+ Users

0-to-1 Product, SwipeHire

PRD to MVP to first 50 users, with 8+ A/B tests run on the funnel to validate activation.

3x ROAS

Full-Funnel Growth Fix, Pixis

One month, one account, a complete funnel restructure instead of a single-lever tweak.

$700K+ Recovered

GTM/Revenue Program, Sensata

1,200 opportunities ranked against a $627M target, closed through direct negotiation.

None of these sat in a strategy deck. Each one was built, shipped and tied to a number a real team depended on.

FIRST 30 DAYS

What the first month in Anakin's Founder's Office looks like.

WEEK 1

Map one product-to-GTM gap

Find where product development and growth acquisition are not yet connected, the same first move behind PriceKeel's CRM/CPQ build.

Why first: size the real gap before building the fix.

WEEK 2-3

Ship the fix and run the growth experiment

Build the feature or funnel fix hands-on, then run the experiment the way the Pixis full-funnel restructure was run, cleanup, test, scale what works.

Why now: a repeatable playbook beats a one-off campaign.

WEEK 4

Tie it to a revenue number and report it

Apply the Sensata Bleeders and Leakers discipline to measure the initiative's business impact, and bring leadership a clear read: what changed, why, and what is next.

Why this fast: success here is outcomes delivered, not activities completed.

CLOSE

You are hiring someone to connect product to GTM and own the outcome. I already do that at my own company, with the number attached.

The product half: **a B2B SaaS product built end to end** at PriceKeel, and **SwipeHire shipped 0-to-1** to 50+ users with no delegation layer.

The growth and GTM half: **3x ROAS in one month** at Pixis from a full-funnel fix, and **$700K+ recovered in two quarters** at Sensata from a GTM/revenue program built from scratch.
