Hiring Team, Thumbtack

At Plug Power I ran Paid Search and Paid Social across Google Ads, Microsoft Ads, Meta and LinkedIn, cutting CPA 25% through bid optimization and 15+ A/B tests on creative, audience and landing pages, then automated the WordPress and Pardot lead flow to cut cost per lead 50%. That is the full loop your posting describes: budget pacing, creative iteration, a cross-functional testing roadmap, and the measurement that proves which lever actually moved the number.

The split between consumer and Pro that you're hiring for is familiar too. At Pixis I ran paid and retail media for an 8-client portfolio at $15K-$90K per client per month, including iOS app UA on Appsflyer and Adjust, deciding weekly what to scale or cut with Amplitude and Tableau, and cut churn 50% through account strategy and creative refresh across very different buyer types in the same book. At Sensata I led paid launch campaigns for new B2B product lines and built the KPI frameworks in SQL and GA4 that separated real intent from noise.

I also automate my own reporting with AI agents built on Claude at Applied Materials, the same instinct for testing a new tool or channel ahead of the rest of the market that your posting calls out directly.

Proof trail at adhi-growth-ai.vercel.app/ref/thumbtack.
