## SUMMARY

Strategy and operations analyst who runs **test-and-learn pilots** end to end, pulling the SQL and Excel analysis myself. Built the FY2026 Bleeders & Leakers program at Sensata from a blank page, a 1,200-opportunity test tracked against a $627M target that surfaced **$433M in margin gaps** for leadership to act on. Took a new sensing product from 0 to 1 at Sensata, running structured customer interviews and SQL-built KPI frameworks before scaling the launch across North America and Europe. Partners with Sales, Engineering and Accounts at Applied Materials to size markets neither function could map alone, automating the recurring data pulls with **Claude AI agents** so decisions move faster than the next quarterly review.
