SUMMARY

Product manager who ties **roadmap decisions** to the economics behind them, not just the user flow. At Sensata I owned the sensor product roadmap and a 100+ feature backlog with engineering across 3 regions, cutting time-to-market 20% and accelerating releases 25%. As Pricing Lead I ran the Bleeders & Leakers margin-recovery program and reset distributor and channel-partner margins from 53% to 61%, the same partner-facing, data-backed negotiation a card program needs with its issuing and network partners. I also built predictive models in R (10-fold cross-validation, feature selection) on credit-approval drivers, and I run 30+ customer interviews to turn partner feedback into shipped features. Now Strategic Marketing III at Applied Materials, building forecasting models and running AI agents on Claude to automate repetitive analysis.
