Hiring Team, Google

The Sales Operations Senior Associate posting for Global Business Strategy and Planning opens with a management-consulting, sales-operations, business-strategy or corporate-advisory background as the floor, not a preference. I led a 5-consultant team through a TAM/SAM/SOM engagement for Safran, taking 170 facilities down to a SAM of 28 across four verticals and briefing the roadmap straight to their leadership. That is the same muscle a central Strategy and Planning team needs: take an ambiguous, cross-functional question, build a prioritized scope fast, and stay close enough to the data to defend the recommendation in the room.

The complex-data-set side of the posting is not new territory either. At Sensata I built the FY2026 Bleeders and Leakers Power BI dashboard, modeling 1,200 pricing opportunities against a $627M target across 3 regions and 20 product lines so leadership could prioritize $433M in margin gaps instead of debating where to look. I carried that same rigor into AP26 revenue models and multimillion-dollar customer quotes directly with senior executives, and I run it today as founder of PriceKeel, where I own CRM, CPQ, forecast and pipeline reviews and deal approvals with an audit trail Finance can check against the underlying deal data. None of that holds past one quarter without the operating cadence behind it, which is why I also run OKRs and the weekly and quarterly business reviews that turn an analysis into a habit.

The advertising and digital-media environment this team's business runs on is also familiar ground. At Pixis I carried P&L targets for an 8-client, $15K to $90K per month advertising portfolio, running retail media on Amazon Ads and Criteo with consultative account management day to day; at Plug Power I led paid search and social across Google Ads, Microsoft Ads, Meta and LinkedIn. I write my own SQL and build my own models rather than handing someone else's chart to a room, and I automate the recurring parts of that analysis with AI agents built on Claude at Applied Materials today. I would bring that same bias toward a defensible model and a working cadence to the GBS&O Strategy and Planning team.
