Hiring Team, Everway

Your posting centers on a deal-governance framework: pricing policies, discount thresholds, approval processes and escalation rules that protect ARR. I built exactly that inside Sensata's Bleeders and Leakers program, approving deal exceptions against competitive gaps and each customer's own willingness to pay, which recovered $700K plus in margin in two quarters and raised distributor and channel-partner margins from 53% to 61% in the same stretch.

I have since built the tooling behind that same desk. PriceKeel, the company I founded, reads a live discount exception inside the deal platform and recommends a threshold learned from a company's own closed-won and closed-lost history, then logs the audit trail Finance needs to sign off on it. Defining the rule logic and benchmarks behind that kind of AI-assisted deal review, the exact mandate in your posting, is the company I run day to day, not a new skill I would need to pick up.

The commercial-partner side of the role maps to work I have already run with senior stakeholders. At Sensata I shaped AP26 revenue models and complex, multimillion-dollar, multi-year customer quotes with executives, and built the FY2026 Bleeders and Leakers Power BI dashboard tracking 1,200 pricing opportunities against a $627M target, surfacing $433M in margin gaps so leadership could prioritize instead of guess. At Plug Power I presented budgets and plans to leadership for approval directly, the same influence without line authority your posting asks for across Sales and Finance.

Right now, as Strategic Marketing III at Applied Materials, I automate repetitive pricing analysis with Claude AI agents, the same instinct behind the rules and benchmarks a deal desk needs to run AI-assisted review well. I would bring someone who has priced on both sides of a deal, the seller's and the approver's, into a seat built to own both. Proof trail at adhi-pricing-ai.vercel.app/ref/everway.
