

PITCH DECK | SALESFORCE DEAL DESK MANAGER

One seat here reviews complex deals for risk, guides Sales on deal structure, owns the final approval call, and protects margin through concession strategy across Finance, Legal and Operations. I have already run every piece of that loop.

Deal-by-deal risk judgment, a governance trail Finance can audit, and the concession-strategy discipline that keeps revenue and margin both intact.

\$700K+ margin recovered in 2 quarters via deal-by-deal risk review at Sensata

53% to 61% distributor margin lift from restructured concession terms

Guardrail engine + Finance-auditable approval trail, founder of PriceKeel

1,200 opportunities tracked against a \$627M target across 3 regions, 4 product families, 20 lines

Claude AI agents automating recurring pricing analysis at Applied Materials

Deal desk for AMER sales verticals is three jobs held by one seat: risk review, concession strategy, and cross-functional governance.

What losing that discipline runs into

A deal desk without deal-by-deal risk review does not fail loudly. It fails as a concession granted without a competitive read behind it, a contractual term nobody flagged for Legal, and a margin number that looked fine in the deal room and did not survive the quarter.

Sales, Finance, Legal and Operations all touch the same complex transaction on its way to close, so a gap in risk mitigation or concession discipline becomes everyone's problem at renewal, not just one team's.

The fix is not another approval gate. It is someone who treats deal review, concession strategy and cross-functional governance as one connected loop instead of three separate jobs.

What I have already run

At **PriceKeel**, I built the discount guardrail engine and the Finance-auditable decision trail myself, the same final-approval governance this seat owns for Salesforce's own deals.

At **Sensata**, I reviewed deals for risk one by one inside the Bleeders and Leakers program, then restructured concession terms that moved distributor margins from 53% to 61%.

Both mean I have sat on the deal-review side and the governance-design side of the same gate, not just one or the other.

A Deal Desk Manager who reviews complex deals on behalf of Strategic Business Practices, guides Sales on deal structure, develops concession strategies that optimize revenue and protect margins, and owns the final approval decision is describing this exact loop: review the risk, structure the concession, keep Finance and Legal in the record.

What the Deal Desk Manager opening asks for, and where the proof already sits.

What the role covers

- Review and vet complex deals on behalf of Strategic Business Practices and Sales Executives; guide Sales on deal structures and take ownership of final approval decisions.*
- Partner with account teams to develop concession strategies that optimize revenue and protect margins.*
- Partner with product teams on optimal pricing models and strategies for new products and bundled solutions; develop best practices for pricing and business terms.*
- Collaborate with Finance, Legal and Operations to optimize contract terms and close deals.*

My Proof

- Complex deal review and final approval:** led the Bleeders and Leakers program at Sensata, reviewing deal-by-deal for risk and recovering \$700K+ in margin in 2 quarters; built and run PriceKeel's guardrail engine and final-approval record daily.
- Concession strategy that protects margin:** restructured concession terms on parts sold through distribution, raising distributor margins from 53% to 61% in under 2 quarters without losing the account.
- Pricing models for new products and bundles:** owned GTM pricing for new sensing products at Sensata (\$2M+ first-year revenue) and build competitive, value-based pricing at Applied Materials for a fast-growing, bundled market.
- Cross-functional partnership:** partnered with senior executives on AP26 revenue models and multimillion-dollar customer quotes, and sell PriceKeel's audit trail directly to RevOps, Sales leadership and Finance today.

Bleeders and Leakers: make every concession defensible before it ever reaches margin.

Built as a BU-wide Power BI system covering 1,200 pricing opportunities against a \$627M target across 3 regions, 4 product families and 20 product lines, with every gap traced to a specific deal before leadership set the next quarter's targets.

\$700K+

Margin Recovered, 2 Quarters

Deal-by-deal risk review against competitive gaps and each customer's own willingness to pay, the same analytical rigor a complex-transaction review runs on every deal.

53% to 61%

Distributor Margin Lift

Restructured the channel's concession terms and documented them for governance review, so the new margin held past the first quarter.

\$433M

Margin Gaps Surfaced

Every gap traced to a specific deal by salesperson and product line, the same record-level detail a final-approval decision depends on.

At PriceKeel that same instinct became the operating model: I built the guardrail engine and the audit trail myself, so the concession and the approval record are never two different stories.

What the first month owning Deal Desk for an AMER sales vertical at Salesforce looks like.

WEEK 1

Learn the vertical's deal patterns and risk points

Sit with Sales Leadership, account teams, Finance and Legal to walk the current deal-review and concession-approval process, and shadow one complex deal from review to final approval.

Why first: the same instinct that had me learn a BU's own pricing patterns before building the Bleeders and Leakers model on top of them.

WEEK 2-3

Own a full deal review cycle

Take ownership of one sales territory's complex-deal pipeline end to end: review for risk, guide Sales on deal-structure tradeoffs, and partner with account teams on a concession strategy that protects margin.

Why now: the same deal-by-deal discipline that recovered \$700K+ in margin inside the Bleeders and Leakers program.

WEEK 4

Publish a pricing best practice for one product line

Pick one product or bundled-solution line, build the pricing and business-terms best practice from real deal data, and enable Sales on it before the next quarter's deal reviews start.

Why this fast: a concession strategy only earns its keep if Sales can run it without re-asking Deal Desk every time.

CLOSE

You are hiring someone to keep deal review, concession strategy and governance honest across every complex transaction. I have already built that discipline, from both sides of the deal.

The core proof is Sensata: a Power BI system tracking **1,200 pricing opportunities against a \$627M target**, distributor margins restructured **from 53% to 61%**, and \$700K+ in margin recovered in 2 quarters through deal-by-deal risk review and concession strategy.

What is harder to find is someone who has also spent the last several months owning the guardrail engine and the final-approval audit trail for his own company's deal flow. **I built that at PriceKeel**, so the governance discipline this role runs with Finance, Legal and Operations is not something I would need to learn on the job, only which AMER vertical to point it at first.
