Hiring Team, CoreWeave

Your posting asks for someone who can identify a performance gap at the rep, team or regional level and turn it into a data-backed recommendation. I built exactly that at Sensata: the FY2026 Bleeders and Leakers Power BI dashboard, tracking 1,200 pricing opportunities against a $627M target across 3 regions, 4 product families and 20 product lines, with win rate, average $/win and stage distribution broken out by salesperson. That dashboard surfaced $433M in margin gaps for leadership to prioritize, and acting on it recovered $700K plus in margin in two quarters while raising distributor and channel-partner margins from 53% to 61%.

The win/loss, pipeline conversion and sales cycle analysis in your req is the same muscle. Stage distribution and win-rate reporting only matter if someone also closes the loop with the field, so I trained 50 plus Sensata reps on the sales enablement built from that performance data, lifting win rates 30%. I also shaped AP26 revenue models and multimillion-dollar customer quotes directly with senior executives, the kind of forecast-review and QBR input your Sales Leadership and Finance partners would expect from this seat.

You are also asking for someone who is AI-first by default, not someone who will get there eventually. I already automate recurring forecasting and reporting work with Claude AI agents at Applied Materials, on top of building the forecasting and market-sizing models those agents feed. I run the adjacent stack today as founder of PriceKeel too: I set up and operate the company's own CRM and CPQ, forecast and pipeline reviews, and deal approvals, with an audit trail Finance can check without asking me first.

What draws me to this specific opening is the moment CoreWeave is in. A newly public hyperscaler scaling its Global Field Organization needs operational rigor that does not slow the team down, and that is the balance I have been building toward since Sensata: dashboards that hold people accountable without another meeting. More detail on the projects above sits at adhi-growth-ai.vercel.app/ref/coreweave
