PITCH DECK | DECAGON BUSINESS OPERATIONS, PRICING STRATEGY

One seat in your Founder's Office owns pricing and packaging strategy, end-to-end deal strategy, and the internal commercial process that has to hold up as Decagon scales. I have already built and run that exact loop, for a company I founded.

Pricing and packaging strategy, deal strategy from proposal to close, and commercial-process building from someone who has run all three for his own deal platform, not just one of them for someone else's.

- **$700K+** margin recovered in 2 quarters leading Sensata's Bleeders & Leakers program
- **53% to 61%** distributor margin lift from repriced discount logic
- **CRM + CPQ + deal approvals** set up and run end to end, founder of PriceKeel
- **$627M target, 1,200 deals** tracked across 3 regions, 4 product families, 20 lines
- **Claude AI agents** automating recurring pricing analysis at Applied Materials

WHY THIS DECK EXISTS

Pricing a fast-growing agentic AI platform is really three jobs held by one Founder's Office generalist, not three separate hires.

What losing that connection runs into

Pricing and packaging strategy that is not tied to the deal desk becomes a rate card nobody trusts by the second renewal.

Deal strategy that is not tied to an internal process becomes a proposal AEs write from memory instead of a system Finance can stand behind.

The fix is not another pricing memo. It is one generalist who treats packaging, deal strategy and the internal process as a single connected loop.

What I have already run

At **PriceKeel**, I built the pricing and packaging strategy, the deal-approvals process, and the CRM/CPQ system it all runs on, myself, end to end.

At **Sensata**, I led global pricing strategy for a multi-$100M BU and built the Bleeders and Leakers program that turned deal-by-deal negotiation into a repeatable internal process.

Both mean I have sat on the strategy side and the process-building side of the same loop, not just one or the other.

A Business Operations seat that develops pricing and packaging strategy, owns end-to-end deal strategy, and builds internal commercial processes to match growth is describing this exact loop, run once already at two different scales.

THE REQ, MAPPED

What the Founder's Office pricing and commercial-strategy seat asks for, and where the proof already sits.

What the role covers

> *Work to develop and refine Decagon's pricing and packaging strategy.*

> *Own end-to-end deal strategy for enterprise opportunities, partnering directly with account executives and sales leaders to build proposals and drive deals to close.*

> *Build and scale internal pricing and commercial processes to match Decagon's growth.*

> *Be a thought leader in how to price agentic AI solutions.*

My Proof

Pricing and packaging strategy: designed PriceKeel's guardrail engine and packaging from zero; built the Bleeders and Leakers program at Sensata into a repeatable pricing process from scratch.

End-to-end deal strategy: negotiated multimillion-dollar customer proposals that closed deals and partnered with senior executives on AP26 revenue models at Sensata; run PriceKeel's own deal-approvals process today.

Internal commercial processes at scale: set up and run PriceKeel's CRM, CPQ, forecast and pipeline reviews alone; built the BU-wide Power BI price-increase model at Sensata.

Pricing agentic AI: PriceKeel is itself an AI-native pricing-decision product, and I automate recurring pricing analysis with AI agents built on Claude at Applied Materials.

THE PROOF, IN DEPTH

Bleeders and Leakers: turn deal-by-deal negotiation into a process that scales past one person.

Built as a BU-wide Power BI system covering 1,200 pricing opportunities against a $627M target across 3 regions, 4 product families and 20 product lines, with profitability by segment checked before leadership set the next quarter's targets.

$700K+

Margin Recovered, 2 Quarters

Deal-strategy negotiation built on competitive gaps and each customer's own willingness to pay, not a rate-card markdown.

53% to 61%

Distributor Margin Lift

Repriced the channel logic and documented it as an internal process, so the new discount limits held past the first quarter.

$433M

Margin Gaps Surfaced

Every gap traced to a specific deal by salesperson and product line, the same segment-level detail an enterprise GTM org needs.

At PriceKeel that same instinct became the operating model: I build the pricing and packaging strategy, run the deal-approvals process, and own the CRM and CPQ configuration myself, so the strategy and the process are never two separate jobs.

FIRST 30 DAYS

What the first month inside Decagon's Founder's Office could look like.

WEEK 1

Learn the current GTM motion and pricing logic

Sit with the GTM team and the rest of the Founder's Office to map the current pricing and packaging structure, the deal-approval path, and where proposals stall on the way to close.

Why first: the same instinct that had me map PriceKeel's own deal-approvals process before building the guardrail engine on top of it.

WEEK 2-3

Own one enterprise deal strategy end to end

Take one live enterprise opportunity from proposal to close, partnering directly with the account executive, and document the pricing and packaging logic behind the proposal as a reusable process.

Why now: the same deal-by-deal discipline that made the Bleeders and Leakers program repeatable instead of a one-off win.

WEEK 4

Scale one commercial process to match growth

Turn that first deal's pricing logic into a documented internal process the next account executive can run without relearning it, and flag one agentic-AI pricing question worth a Founder's Office review.

Why this fast: a commercial process only earns its keep once it survives being run by someone other than the person who built it.

CLOSE

You are hiring someone to own pricing and packaging strategy, deal strategy, and the commercial process behind both. I have already built that loop, for a company I run myself.

The core proof is Sensata: a Power BI system tracking **1,200 pricing opportunities against a $627M target**, distributor margins lifted **from 53% to 61%**, and $700K+ in margin recovered in 2 quarters through deal-by-deal negotiation turned into a repeatable process.

What is harder to find is someone who has also spent the last several months owning the pricing strategy, deal-approvals process and CRM/CPQ system for his own company's deal flow. **I built that at PriceKeel**, so the strategy-to-process loop this role runs is not something I would need to learn on the job.
