Hiring Team, goadgo

At GenY Medium I rebuilt Google Merchant Center and Meta catalog feeds for D2C e-commerce brands and turned a stale catalog into 16x ROAS. That is the same acquisition infrastructure goadgo runs for its Shopify brands, and it is where I would start: clean the catalog and feed signal first, then scale the paid channels around it.

The rest of the role maps just as closely to what I have already run. At Pixis I managed an 8-client B2B SaaS AI-adtech portfolio with per-client budgets of $15K-$90K/month, carrying P&L targets and cutting churn 50% through account strategy and channel diversification, the CAC-to-LTV discipline a seed-stage SaaS platform needs from its growth hire. That same stint had me running retail media and creator-adjacent placements (Amazon Ads, Criteo), the same paid-next-to-a-trusted-voice logic goadgo's affiliate and influencer channels run on. At Plug Power I ran Paid Search and Paid Social across Google Ads, Microsoft Ads, Meta and LinkedIn, cutting CPA 25% through bid optimization and A/B testing, and built the SEO and partnership work that grows a non-paid channel alongside the paid ones.

I also already automate the reporting side of this job. At Applied Materials I built AI agents on Claude to cut the repetitive parts of forecasting and market analysis, the same dashboard-and-reporting automation a 10-person team needs from one growth hire wearing every hat.
