PITCH DECK | JOVEO SENIOR MANAGER, CEO'S OFFICE

Being the connective tissue between strategy and execution at Joveo means turning ambiguity into a number the CXO can act on, across functions and regions at once. I already run that loop, on a company I built myself and inside a multi-$100M business unit.

A record of turning a vague mandate into a negotiated outcome: a $700K+ margin program built from a blank dashboard, a company raised and run end to end, and AI agents already doing the repetitive side of the analysis.

- **Founder & CEO** of PriceKeel, running fundraising, pilots and the deal-approval process myself
- **$700K+ / 2 Quarters** margin recovered off a whitespace shortlist I built at Sensata
- **$433M / 1,200 Opportunities** Bleeders and Leakers program across 3 regions, 20 product lines
- **Claude AI Agents** automating repetitive market and competitive analysis today
- **8-Person Team / $15K-$90K per Client** managed and turned around at Pixis, churn cut 50%

WHY THIS DECK EXISTS

A strategic extension of the CXO does not get to wait for a clean lane. The job is turning this week's ambiguity into a framework, then a number, before someone else has to.

What that actually requires

Acting as a strategic extension of the CXO, driving high-priority initiatives across functions and regions without a fixed scope.

Leading deep-dive analyses into business performance, market opportunities and competitive positioning that leadership can actually act on.

Building and operationalizing frameworks that turn strategic intent into measurable outcomes, then owning the cross-functional project that ships it.

What I have already run, at that exact layer

Took the **Bleeders and Leakers program** at Sensata from a vague mandate to a $433M whitespace shortlist and $700K+ recovered, negotiated directly with senior executives in 2 quarters.

Founded **PriceKeel** and run its fundraising, pilots and deal-approval process myself, with no team to hand any of it off to.

Turn **Sales, Engineering and Accounts** input into one market-sizing view at Applied Materials today, the same connective-tissue role across functions.

> **The through-line: I have already turned ambiguity into a framework and a framework into a negotiated number, before anyone called it a CEO's Office job.**

THE REQ, MAPPED

What the Joveo Senior Manager opening asks for, and where the proof already sits.

What the role covers

> *Act as a strategic extension of the CXO, driving high-priority initiatives across functions and regions.*

> *Partner with leadership to identify, plan, and execute AI-led growth, efficiency, and transformation projects.*

> *Lead deep-dive analyses into business performance, market opportunities, and competitive positioning.*

> *Build and operationalize frameworks that translate strategic intent into measurable outcomes.*

My proof

Strategic extension of the CXO: ran the Bleeders and Leakers program for the Industrial BU's leadership end to end, from a vague margin mandate to a negotiated $700K+ outcome.

AI-led growth and efficiency: automate the repetitive side of market and competitive analysis today with AI agents built on Claude at Applied Materials.

Deep-dive analyses: built the FY2026 Power BI dashboard that turned 1,200 scattered opportunities into a $433M shortlist across 3 regions and 20 product lines.

Frameworks to measurable outcomes: built PriceKeel's CRM, CPQ and deal-approval process from zero as founder, the same build-the-framework-first instinct.

THE PROOF, IN DEPTH

Bleeders and Leakers: a vague margin mandate turned into a whitespace shortlist and a negotiated number.

Built as the owner of a program with no existing dashboard, no existing owner and no existing partner relationships, the same starting point a CXO's "figure this out" priority usually looks like.

$433M / 1,200

Whitespace Shortlist Built

1,200 pricing opportunities against a $627M target, surfaced for leadership to prioritize by salesperson and product line.

$700K+ / 2Q

Margin Recovered

Negotiated from competitive gaps and customer willingness to pay, direct with senior executives.

53% to 61%

Partner Margin Lift

Built the distributor and channel-partner relationships that made repricing possible in under 2 quarters.

The same instinct runs through PriceKeel, where I build the pipeline, the pricing framework and the investor narrative myself as founder, and through Applied Materials, where AI agents built on Claude already handle the repetitive side of the analysis.

FIRST 30 DAYS

What the first month as a strategic extension of Joveo's CXO would look like.

WEEK 1

Map where today's priorities are actually stuck

Sit with the CXO, functional leads and regional teams to find where an AI-led growth project, an efficiency initiative or a cross-functional handoff is stalling today, the same audit that grounded the Bleeders and Leakers program before a dashboard existed.

Why first: a framework built on assumptions instead of real blockers is the fastest way to miss the mark.

WEEK 2-3

Ship the first deep-dive analysis

Take one business-performance or market-opportunity question and turn it into a decision-ready recommendation, the same move that turned 1,200 scattered opportunities into one shortlist at Sensata.

Why now: one measured recommendation that moves a real decision beats a week-one list of ideas.

WEEK 4

Turn the first win into the operating cadence

Use what the first deliverable proved to set the recurring rhythm, be it a business review, a cross-functional checkpoint or a tracked initiative, that keeps producing outcomes without rebuilding it from scratch every cycle.

Why this fast: a cadence only earns trust once it has already moved one real decision.

CLOSE

Joveo needs someone who already treats "connective tissue between strategy and execution" as a daily job, not a job description. I have run that exact loop, on a company I built myself and inside a multi-$100M business unit.

The core proof is Sensata and PriceKeel together: a **$700K+ margin program** built on a whitespace shortlist I built from zero, and a company of my own where I run fundraising, pilots and the deal-approval process myself, with no team to hand any of it off to.

What is harder to find is someone who has done that inside a large, multi-region business and is already running the AI-led side of it today: automating repetitive market and competitive analysis with **Claude agents** at Applied Materials. That combination, strategy, execution and AI fluency in one seat, is what a CEO's Office needs most.
